Safe Families - Paws and All

Make a \$2 Donation and be part of the change today!

Show Australia that the whole family needs protection from domestic and family violence - paws and all!

Lucy's Project is a national peak body working to improve access to supports for human and animal victim-survivors of domestic and family violence. We know the important role that companion animals play in the lives of victim-survivors. We also know that companion animals can become victims of family violence themselves. We create animal-inclusive pathways to safety because safe animals means safe humans.
